Reviews

Without doubt, this is actually the greatest work by any writer. It is actually written in simple terms instead of confusing. I found out this ebook from my i and dad recommended this pdf to understand.

Accordingly, the Cenozoic beds rest on the Mesozoic Red Sandstone; and the Mesozoic, on crystalline rocks of either Paleozoic or Archaean age. The three periods of Mesozoic time are the Triassic, the Jurassic and the Cretaceous or Chalk period. The Red sandstone, which outcrops about all the ridges and is well exhibited at the East Haven quarries, was made during the later part of the Triassic period and part of the Jurassic, and hence it is called the Jura-Trias sandstone. New Haven bay is both topographically and geologically the termination of the Connecticut valley. In the period of the Jura-Trias, an estuary, ten to thirty miles wide, extended along the valley to northern Massachusetts; and in this estuary the sandstone was formed, nearly as sand-beds are now formed in a Delaware bay. The sands were made from the decay of granite, gneiss, mica schist, and other related rocks on either side of the estuary; and they were carried into the estuary by the streams of the land. The waters of the estuary are known to have been either fresh...
