Step 2. The transverse mesocolon is detached from the stomach, so as to allow the stomach to be drawn well through the opening. A clamp is then applied in the same position which it occupied at the original operation. Clamps are applied to the jejunum on each side of the anastomosis. (Drawn by Mr. L. R. Braithwaite.) Case 3.--Jejunal ulcer following gastro-enterostomy. Excision. Roux s operation. Appendicectomy. Mrs. S. Sent by Dr. Bingham, Lancaster. Three years ago she had gastroenterostomy done by a London surgeon for duodenal ulcer. For some months she was better, then began to have pains in the body soon after food--almost immediately after swallowing it. She began to diet herself at once, and has done so ever since. Nineteen months ago she had a very severe haematemesis and nearly died,...
