RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1902 Excerpt: . . . in the present expedition. The line run by the Albatross from San Francisco to Tahiti starts in lat. 31 10 N. , long. 125 W. , and terminates at Tahiti off Pt. Venus about in lat. 17 30 S. , and long. , 149 30 W. That of the Challenger starting north of the Hawaiian Islands in lat. 38 9 N. , and long. 156 25 W. , and ending also at Tahiti, converges towards the line of the Albatross, so that we have an excellent opportunity of comparing the collections of the Challenger in the central Pacific with those obtained by the Albatross from the great red-clay and manganese-nodule area of the Pacific Ocean to the eastward. An examination of the results as recorded by Sir John Murray, 1 and those which I here give from the trawling of the Albatross show plainly that at great depths and far from continental areas or insular plateaux the bottom fauna of the great depths is comparatively poor except when the trawling is made in the line of the great equatorial currents, where the bottom fauna receives a larger amount of food, derived from the dead remains of the pelagic fauna falling to the bottom. A similar increase in the number of animals brought up in the trawl can also be noted in the hauls made by the Challenger on the line east of Japan, while practically in the track of the great Japanese current sweeping to the...
