Springer Basel, Switzerland, 2012. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.In September 1998, during the International Workshop on Analysis and Vibrating Systems held in Canmore, Alberta, Canada, it was decided by a group of participants to honour Peter Lancaster on the occasion of his 70th birthday with a volume in the series Operator Theory: Advances and Applications . Friends and colleagues responded enthusiastically to this proposal and within a short time we put together the volume which is now presented to the reader. Regarding acceptance of papers we followed the usual rules of the journal Integral Equations and Operator Theory . The papers are dedicated to different problems in matrix and operator theory, especially to the areas in which Peter contributed so richly. At our request, Peter agreed to write an autobiographical paper, which appears at the beginning of the volume. It continues with the list of Peter's publications. We believe that this volume will pay tribute to Peter on his outstanding achievements in different areas of mathematics. I. Gohberg, H.
