Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1909 Excerpt: .cryoscopic procedures), the Bureau is compiling the data from all the groups. Results from this broad program should provide information on the agreement that can be reached by different laboratories using various cryoscopic techniques to assay the purity of similar systems. Purification of a Special Lot of Mercury. Although mercury is neither abundantly nor widely distributed in nature, it has played an important role in alchemy, medicine, and modern science through the ages. One of mercury s important physical properties is its density, which has not been accurately determined. To aid in the determination of this physical property the Bureau subjected 1,000 lb of the virgin metal to careful refining, including acid washing to remove all base metals. The entire purified product was double distilled and then mixed to a uniform substance in a single container. About 40 lb was sent to the National Physical Laboratory at Teddington, England, for a determination of its density. The rest will be used for special scientific research requiring very pure mercury with an accurately determined density. Apparatus used in studying the photochemical decomposition of organic and inorganic compounds which play important roles in air pollution (page 49). Reagent Chemicals. Participation in the preparation of specifications and test methods for reagents represents an important area of the Bureau s cooperative activities. By the continual testing of the reagent chemicals which it buys, the Bureau has long assured its laboratories of high-quality analytical reagents--thus maintaining uniform chemical tools for research. Within...
